HANWEN SHEN

245 W 31st Street, Baltimore, MD 21211 | (+1) 410 318 9509 | hshen11@jhu.edu | https://stevensgeek41.github.io

EDUCATION

Johns Hopkins University — Baltimore,MD

· **M.S.E. in Computer Science** — Aug 2019 - May 2021 (Expected)

Beijing Institute of Technology (BIT) — Beijing, China

· **B.S. in Computer Science** — Sep 2015 - Jun 2019

· Overall GPA: 89.02/100 (3.83/4.00), Major GPA: 90.93/100 (3.90/4.00), Outstanding Graduate Student (10%)

· Relevant Courses: Data Structure & Algorithm Design, Comprehensive Training for Software Engineering, Linux Programming, Image Processing Technology, Database Systems Development, Modern Data Analysis, Object-Oriented Programming

TECHNICAL STRENGTHS

Computer Languages	C/C++, Python, MATLAB, Java, C#, HTML
Software & Tools	OpenCV, OpenCL, Linux, Git, MySQL, PyTorch, Unity3d, Photoshop

EXPERIENCE

Beijing Laboratory of Intelligent Information Technology — Beijing, China

Undergraduate Research Assistant—Contour-based Stereo Matching (Bachelor's Thesis Project) — Dec 2018 - Jun 2019

· Conducted research investigation on stereo matching and implemented algorithms of classical papers using MATLAB

· Proposed a novel constraint of correspondent pixels based on geometry observation made easy by aligned-contours from two input images, resulting in more accurate occlusion judgement during optimization process

· Improved the performance of calssical algorithms by 30% on Middlebury Stereo Vision data sets

· Planned to incorporate deep learning with this method to achieve better overall performance in the future

Software Intelligence Laboratory of Beijing Institute of Technology — Beijing, China

Undergraduate Research Assistant—Human Pose Estimation Based On Deep Learning — Nov 2018 - Jan 2019

· Finished a human pose estimation project to demonstrate real-time human pose with virtual characters in Unity3d

· Combined depth information provided by a single stereo camera with the 2D coordinates estimated by CMU OpenPose library

· Established a simple socket connection to solve the data transmission problem between C# and C++

· Achieved a performance of 25 fps and prompted the project to be adopted by a private company

PerfXLab Technology Co., Ltd. — Beijing, China

R&D Intern—Open-Source PerfCV Project — Jul 2018 - Sep 2018

· Contributed to an open-source PerfCV library aimed at optimizing OpenCV performance on GPU by re-implementing certain functions of OpenCV C++ source code using C and OpenCL, leading to applications like video-stitching

Software Intelligence Laboratory of Beijing Institute of Technology — Beijing, China

Undergraduate Research Assistant—Optical Axis Automatic Calibration System — May 2018 - Jul 2018

· Built an optical axis automatic calibration system, featuring a data processing module, a UI module, and a motor-control module

· Utilized object-oriented method to build the software in C# and used camera SDK to collect and display laser data

· Added crosses to demonstrate the target centre with each frame, meanwhile managed to synchronize the whole procedure

· Tested and debugged the whole system, and prompted it to be accepted by Beijing Remote Sensing Equipment Research Institute

Neusoft — Beijing, China

Software Engineering School Intern—Linpop Chatting Tool Project — Aug 2017 - Sep 2017

· Designed and maintained a database for a lightweight chatting software using MySQL under Linux environment, also provided C function interface to the server end, supporting multi-needs including group chat

HONORS & AWARDS

Outstanding Bachelor's Thesis, Beijing Institute of Technology, 2019

Third Prize of 2019 College Students AI Camp, China Center for International People-to-People Exchange, 2019

Champion of Luzhanqi in University Computer Games Championship, China Association of Artificial Intelligence, 2017
